

GX SERIES WIRING DIAGRAM

L2 - 25mm squ NEG

- L1, L2, L3, L4 should be 25mm squ, tinned copper cable in most cases
- GX5 12V, GX6 and installations with long runs should go up a cable size
- L1 can be wired directly to the battery or the "common" post on the isolation switch
- Winch motors are reverse polarity. There is no full time POS or NEG from solenoid to winch motor

Switch can be illuminated by adding

This is not essential for operation
